

Earth is our home. It is the only planet known to support life.

Let's see how you can play your part in conserving Earth's natural resources and protect the environment.

Organize each action below based on whether it *a) Protects*, *b) Destroys* or *c) Has No Impact* on Earth's supply of natural resources by writing **A**, **B** or **C** on the box next to each action.

- ☐ Use products with low carbon emission
- ☐ Throw garbage into water canals
- ☐ Recycle newspaper
- ☐ Clear more forest to obtain timber
- ☐ Ensure proper disposal of toxic waste
- ☐ Reuse Non-Biodegradable products
- ☐ Drink water from the tap only
- ☐ Increase use of Air-Conditioning
- ☐ Reduce water waste
- ☐ Eat more fruits and vegetables
- ☐ Encourage single-sided printing

Discover the world of science with 1 year access to more than 25 interactive titles at <https://nodma.link/42s> and get 50% off with the promo code: **SCI50**

Type of Resource:

This printable worksheet should be distributed to elementary and middle school students to teach them about earth and its natural resources.

The actual courseware/source of this activity is Earth and the Solar System, one among over 25 best-selling offline interactive educational science courseware called Science Werkz which won the 2013 EDDIE Award for Science E-Learning Solutions in the Upper Elementary and Middle School Categories.

How to use this Resource:

We highly suggest that you use this resource if you are a teacher who wants your elementary or middle school students to learn more about earth and its natural resources. Open the discussion by asking students how they can contribute in preserving the earth.

You can then print this worksheet and ask the students to answer the questions. You can also ask the students to think of an activity they can do for the coming week that can help save the environment, and then ask them to report on what they did the following week.
